CSCI 150 Discrete Mathematics
Homework 0

Saad Mneimneh
Computer Science
Hunter College of CUNY

- Familiarize yourself with the course website

  https://www.cs.hunter.cuny.edu/~saad/courses/dm/

  Alternatively, simply google *Saad Discrete* and the website should show up as the top hit.

- Read the copyright statement on the website displayed in red. Read it multiple times and make sure you really understand what it says.

- Check the tutoring schedule on the website above and observe which times might generally work out best for you. In addition, visit the Dolciani Math Learning Center on the 7th floor of the East Building, where the tutoring will be held throughout the semester.

- Explore the following: Why is discrete math called as such (not to be confused with Discreet)? Why is discrete math essential for the education of someone who is interested in computer science and, in general, anyone really. Find a mathematical problem or setting that we encounter in our daily lives and describe it.

- Read Sections 1-5, and Section 11 of Chapter 0 on the course website (or as much as you can cover from these or more).

- Did you know that there is a museum of mathematics in New York? Check MoMATH at https://momath.org .

Note: This is a very easy homework.
