

Suggested Exercises from Chapter 5

I strongly suggest that all students in the class do at least the exercises from Chapter 5 listed below. There are many other exercises in this chapter that would help your understanding of the material that we have covered so far, but these are the ones for which I will provide solutions.

- 5.2 (all parts)
- 5.3.1 and 5.3.2 for sequence b
- 5.4.1, 2 for part a.
- 5.7.1, 2, 3, 4, 5 for part a (In 5.7.1. assume hit time = 1 cycle)

Since the first exam is on Tuesday, March 1, I will provide the solutions to those who submit the assignment electronically (or on paper to me) no later than Tuesday February 22. This will give you time to study what you do not understand.
