

Suggested Exercises from Chapter 6

I strongly suggest that all students in the class do *at least* these exercises from Chapter 6. There are many other exercises in this chapter that would help your understanding of the material that we have covered so far, but these are the ones for which I will provide solutions.

- 6.2 (all parts)
- 6.3.1a
- 6.3.3a
- 6.5.1
- 6.7.1
- 6.10.1 (a and b)
- 6.10.2
- 6.11.1
- 6.11.2

I will provide the solutions to those who submit the assignment electronically (or on paper to me) no later than March 29. This will give you time to study what you do not understand.
